RELATED BILLS: AB 1827 (2009-10)
AB 857 (2009-10)

BILL SUMMARY: Workforce Development: One-Stop Career Centers

This bill would require the Employment Development Department (EDD), by July 1, 2012, to provide in-person unemployment benefit assistance in at least one one-stop job services center in each of the workforce development areas and that these services be funded through existing moneys available for the administration of the unemployment insurance program.

FISCAL SUMMARY

The EDD estimates it would need 250 Employment Program Representatives and 20 Employment Program Managers to provide in-person services at one-stop career centers at an annual cost of \$28.8 million in 2012-13 (including one-time costs of \$1.8 million for equipment). Annual ongoing costs through December 2015 would be \$27 million. Unknown additional costs, likely in the millions, would also be incurred for renegotiated leases and remodeling needs at the affected one-stops. This funding would come from redirected federal Unemployment Administration Fund currently being used to support Unemployment Insurance (UI) call center and adjudication services. Total costs represent approximately 7 percent of the total administrative grant funds (\$363 million) awarded to California in 2010.

COMMENTS

The Department of Finance is opposed to this bill because it would result in an inefficient use of limited UI resources, resulting in reduced service levels to unemployed workers. In addition, it would result in significant one-time costs for a temporary expansion to locate EDD staff in all 49 workforce investment areas.

The federal government has historically underfunded the costs for the administration of the UI system. In response to limited resources, EDD was forced to make the most efficient use of its funding and approximately ten years ago shifted from a decentralized in-person service model to a centralized call center model with additional self-service access options. This model allows EDD to invest more in personnel services and less in building leases and associated costs.

Even a partial return to a decentralized service model would result in the following inefficiencies:

- Impossible to have a perfect distribution of service representatives at each one-stop due to day to day variances in one-stop traffic. Employees at one career center may be left idle, while another is unable to meet the walk-in demand.
- Need to acquire additional leased space.
- Redesign one-stops to provide for customer service privacy for UI claimants.
- Impossible to serve all non-English speakers with the limited UI staff at one-stops.

Comments (continued)

This bill would require the Employment Development Department (EDD), by July 1, 2012, to provide in-person unemployment benefit assistance in at least one one-stop job services center in each of the workforce development areas. This bill would specify that these services be funded through existing moneys available for the administration of the unemployment insurance program. Finally, these provisions would sunset on December 31, 2015.
